#### **Project Summary:**

The overall study will propose improvements to relieve existing traffic congestion at the interchange of Route 134/I-5 Interchange caused by traffic back-up on Route 134 at the Riverside Drive Interchange off-ramp. Congestion in the location is exacerbated by the traffic movements on local streets in the City's of Burbank and Glendale and the Griffith Park area.

The study will focus on ways to alleviate back up on route 134 and local streets. Specific studies will look at various components including traffic data collection, alternative development cost estimates and alternative evaluation and selection of a suitable alternative. At completion of the Study, alternatives to proceed will be evaluated for future funding.
